

a CAPITAL success

Enfield Civic Centre

Prepared by Apex Lift & Escalator Engineers Limited

Managing Director: Warren Jenchner

Construction Director: Gary Poynter

Project Manager: Joe Salvatore

Construction Sales Consultant: Tom Hambrook

Project Overview

Client: Enfield Council

Apex Lifts carried out installation works to one passenger/goods firefighters and fire evacuation lift at the Civic Centre, headquarters of Enfield London Borough Council.

The Civic Centre, a busy public building, remained fully operational throughout the project, which was successfully completed ahead of the scheduled completion date. This demonstrates our experienced construction team's seamless and effective project programming, management and deliverability.

Scope of Works

- > Provision of open communication, robust project programming, budget forecasting, risk management and financial reporting.
- > Upgrading and replacing the unit through removal of redundant equipment and installation of new lifting equipment including: motor, controller, door operator, safety gears, overspeed governor, entrance doors, buffers and ropes. The lift machine was manufactured to a high standard and tolerance.
- > Replacement of existing motors with new AC gearless Sassi motors.
- > Controller replacement to Thames Valley Controls, including electrical rewiring.
- > Installation of new lift indicators and voice synthesier, ensuring DDA compliance.
- > Execution of precise planning and communication - ensuring compliance with access, storage and security requirements whilst the building remained fully operational.
