

a CAPITAL success

Carl Ekman House

Prepared by Apex Lift & Escalator Engineers Limited

Managing Director: Warren Jenchner

Construction Director: Gary Poynter

Project Manager: Gary Ager

Construction Sales Consultant: Tom Hambrook

Project Overview

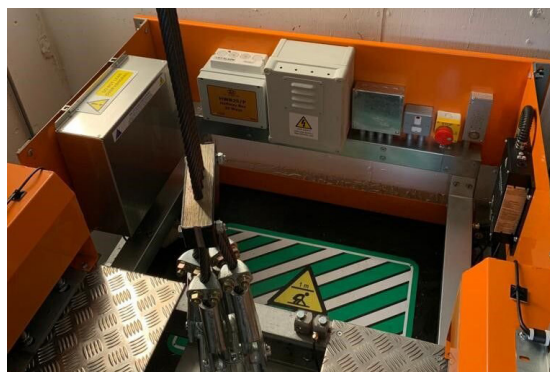

Client: Gravesham Borough Council

Apex Lifts were pleased to have been appointed lead contractors for the modernisation of two passenger lifts at Carl Ekman House. Holding a long-term lift servicing and maintenance partnership with Gravesham Borough Council across their residential sites, Apex Lifts strived to oversee the modernisation project duration with minimal disturbance to residents and end-users, working alongside the client and Lift Consultant, Kevin Moore from P.C.M.

Carl Ekman House is a 14-story, high rise residential building located in Northfleet, Gravesend. Lift modernisation works were carried out to improve reliability within two-phases. This ensured one lift remained fully operational for building occupants throughout the project duration.

Scope of Works

- > Removal of the pre-existing, redundant lift equipment.
- > Complete design, supply, installation, testing and commissioning of a bespoke Apex lift and accompanying equipment.
- > Installation of vandal resistant door panels and Disability Discrimination Act (DDA) compliant components as per specification.
- > Provision of an in-house Resident Liaison Officer (RLO) who provided continuous communication with relevant Gravesham Borough Council staff.
- > Coordination of multiple separate deliveries for bulk items to ensure ease of access and minimal disturbance to residents within the fully occupied building.
- > Supply of Thames Valley Controls 'CMS Anywhere', remote lift monitoring system allowing for real-time feedback and data on each lift's performance.
- > Provision of a 12-month comprehensive lift servicing, maintenance and reactive repair warranty.
