

Project Overview

Client: The Carlton Tower Jumeirah

Apex Lifts recently completed lift modernisation works to three guest passenger lifts, a scenic lift, goods lift and two staff lifts at The Carlton Tower Jumeirah as part of a wider hotel refurbishment project.

The Carlton Tower Jumeirah hotel in Knightsbridge, London, offers luxury accommodation to guests and is part of the international Jumeirah hotel group. Undergoing complete refurbishment, Apex Lifts were contracted to modernise the lifts on-site in accordance to new architectural designs, current British Standards and statutory requirements.

a CAPITAL success

The Carlton Tower Jumeirah

Prepared by Apex Lift & Escalator Engineers Limited

Managing Director: Warren Jenchner

Construction Director: Gary Poynter

Project Manager: Adam Doe

Construction Sales Consultant: Tom Hambrook

Scope of Works

- > Provision of lift design, supply, delivery, installation, testing and commissioning of the lift units per client specification.
- > Removal of redundant control equipment and improvement to existing equipment in-line with current statutory requirements.
- > Upgrading redundant controls with current Kollmorgen control replacements.
- > Complete re-wiring of each lift shaft and controller.
- > Design, supply and fit of new landing and lift car doors.
- > Modification of the new lift car composition to fit new landing doors that suit the existing shafts.
- > Installation of new indicators and push buttons.
- > Bespoke lift car interior including patented brass metalwork and oak wood finishes - as per the surrounding hotel aesthetics.
