

a CAPITAL success

EON Productions, London

Prepared by Apex Lift & Escalator Engineers Limited

Managing Director: Reyaan Shepherd

Service & Repair Director: Steve Thomas

Repairs Manager: Dave Feeney

Repairs Sales Consultant: Ray Murray

Project Overview

Client: EON Productions

Apex Lifts were pleased to have been appointed lead contractors for the partial modernisation to an existing passenger lift on site.

EON Productions is a prestigious film studio based in Piccadilly, London.

With this, it was imperative for the passenger lift on site to be upgraded to current standards and, to improve overall reliability of vertical transportation to all end users.

Scope of Works

- > Replacement of the lift control panel with a new Digital Advanced control system.
- > Full re-wiring including the travelling flex.
- > Installation of a new Bucher Saturn Beta hydraulic lift power unit.
- > Replacement of the existing lift car wiring with new PVC to suit site conditions.
- > Supply and installation of a new flat plate car operating panel to fit the existing back box and, installation of a new lift car autodialler.
- > Upgrades to the interior of the lift car and to include, a mirror polished brass suspended ceiling with a white painted upper frame.
- > Upgrades to the lift car and landing entrances to include polished brass.
- > Upgrades to the existing lift shaft such as new shaft limits, shaft position system for accurate floor levelling and, new landing push buttons.

"A big thank you to Dave Feeney and the Apex team for a great job. Please pass on our special thanks to the engineers, Nigel and Joe, who were very conscientious, respectful and accomodating throughout their time here."

- Nikki Clouder, Office Manager, EON Productions.
